

Roller Hearth Furnaces

Constant hearth speed provided by these furnaces means uniform processing work with trays or continuous loads. Complete installations are supplied with various sizes and pitches of rollers centrifugally cast from high alloy steels. These furnaces are best suited for heat treatment, tube, pipe and automobile industries. Electrically heated, oil or gas-fired, these furnaces are available in temperatures ranging from 6000C to 12000C with or without controlled atmosphere, and 500mm wide by 5m long, up to 2000mm wide by 15m long. Complete with charge and discharge tables, drives, control panel, instruments etc.
